Solar power generation

Adsul technical campus Chas, Ahmednagar have implemented rooftop photovoltaic power station or rooftop PV system that has its electricity generating solar panels mounted on rooftop of a college building. Sun is an important source of renewable energy. Solar power helps to reduce global warming. It creates electricity without producing global warming pollution. Putting Solar PV on the roof is likely to save lots of money. Solar power provides energy reliability, energy security, energy independence. This Activity has been used as a renewable source in the premises of college. Students of Electrical engineering get motivated by real life implementation of solar panel. In a grid connected rooftop photovoltaic power station, the generated electricity can sometimes be sold to the servicing electric utility for use elsewhere in the grid. This arrangement provides payback for the investment installer.

In the mid 2000s, solar companies used various financing plans for customers such as leases and power purchase agreements. Customers could pay for their solar panels over a span of years and get help with payments from credits from net metering programs. The large rooftop installation projects with the main purpose of using the generated electricity as the supplemental power. When the systems generated electricity more than the host building can consume the excess electricity is fed back to the grid to bank with utility company through net metering

According to the requirements of the electricity power in campus after discussion with experts, they decided to install least 20KW generating capacity plant on rooftop of college building. The cost required to implement this project had approximate 20 lakh rupees approx.

Waste Management Steps

Our institute has taken various initiatives to maintain environment friendly campus. The campus is full of greenery and always it is kept clean and neat.

The institute implements effective waste management through waste separation and recycling the waste. Students and faculty members are also actively involving in campus cleaning activity by knowing their view point about the waste management techniques in the campus. For solid waste, housekeeping institute has appointed Raj Hons Agency to maintain clean and green campus. Raj Hons agency collects all solid waste except E-waste and disposes it at disposal center which is located 2-3 km away from the institute. Institute has also initiated Vermicomposting Plant to manage the degradable waste.

E- Waste Management steps

Faculty and students collect the E-waste from the institute campus , after collecting these materials it is delivered to “Ecowell E- Waste Consultants” an e-waste collecting centre situated at Delhi Gate, Ahmednagar. The process of recycling of E-waste of “Electronic Recycling Solutions” is as follows:

- Picking Shed
- Disassembly
- First size reduction process
- Second size reduction process
- Over-Band magnet
- Non-metallic and metallic components separation
- Water separation

1. **Picking Shed:** When the e-waste items arrive at the recycling plants, the first step involves sorting all the items manually. Batteries are removed for quality check.
2. **Disassembly:** After sorting by hand, the second step involves a serious labor intensive process of manual dismantling. The e-waste items are taken apart to retrieve all the parts and then categorized into core materials and components. The dismantled items are then separated into various categories into parts that can be re-used or still continue the recycling processes.
3. **First size reduction process:** Here, items that cannot be dismantled efficiently are shredded together with the other dismantled parts to pieces less than 2 inches in diameter. It is done in preparation for further categorization of the finer e-waste pieces.
4. **Second size reduction process:** The finer e-waste particles are then evenly spread out through an automated shaking process on a conveyor belt. The well spread out e-waste pieces are then broken down further. At this stage, any dust is extracted and discarded in a way that does not degrade the environmentally.
5. **Over-band Magnet:** At this step, over-band magnet is used to remove all the magnetic materials including steel and iron from the e-waste debris.
6. **Non-metallic and metallic components separation:** The sixth step is the separation of metals and non-metallic components. Copper, aluminum, and brass are separated from the debris to only leave behind non-metallic materials. The metals are either sold as raw materials or re-used for fresh manufacture.
7. **Water Separation:** As the last step, plastic content is separated from glass by use of water. Once separated, all the materials retrieved can then be resold as raw materials for re-use. The products sold include plastic, glass, copper, iron, steel, shredded circuit boards, and valuable metal mix.

OPEN WELL & WATER BUND

The Institute has its own open well located in campus premises the ground water reaches naturally. And the water can be lifted 24 hours by a centrifugal pump with the help of 2HP motor. The water is stored in Ground water storage tank located to the back side of building. Some water is then treated for drinking purpose through water treatment plant and domestic water is again lifted up in the overhead tanks located at terrace through which it is distributed to lavatories, gardening and laboratories. The water is stored in various locations in ground water tanks of size 8 x 4 x 1 m, elevated tanks.

Maintenance of Water bodies and Distribution system in the campus

The water bodies are maintained regularly so as to provide sustainable, consistent, economic safe and adequate water to the campus. The main objective of the maintenance is to provide diseases free environment. In the campus, the process of Chlorination will be carried out to kill bacteria, viruses and other microbes present in water. Mainly it is carried out to prevent the spread of water borne diseases like cholera, dysentery and typhoid etc. The distribution of water is done through well equipped system of pipes. By the process of Ozonisation and Reverse Osmosis, the water is treated as drinking water and supplied through a separate type of distribution system and other set of distribution pipes are used for all other activities. By using Low flow plumbing fixtures, the wastage of water is highly reduced. All the collaborator of the college are educated and motivated about the importance and the usage of water in the campus. Scheduled Inspection of machineries is done in daily, weekly, monthly and annual basis in the campus. In order to avoid leakages and to prevent wastage of water, overall distribution system in the campus is well maintained and supervised by Maintenance Department of the college.

WATER CONSERVATION FACILITIES AVAILABLE IN THE INSTITUTION

The college has its own water treatment plant located above main seminar hall in the campus. The treatment process is based on Reverse Osmosis and the treated water is used for drinking purpose by the students, staff, and visitors. The water is supplied through water distribution system into the water coolers provided at 3 locations in the Building. The portable water is distributed through 2 inches PVC pipes throughout the building.

Green Campus Policy

The green campus concept offers an institution the opportunity to take the lead in redefining its environmental culture and developing new paradigms by creating sustainable solutions to environmental, social and economic needs of the mankind. To increase the green cover in and around the campus.

A Green Campus Emphasizes on the following aspects:

- The College follows "Go Green and Grow Green" policy.
- Greenery to provide pollution free air and carbon sink.
- A clean campus.
- Minimise waste and consumption of water and energy.
- Adaption and deployment of environment friendly activities.
- The college pays considerable attention to minimise the production of waste in the campus and they're by advice the officials administering various programs, activities to restrain from using disposable products and flex banners.
- The college has policy on a recycling to be put into practice at student level through entrepreneurship development cell.
- Ban the use of single use plastic in canteen and in the college premises.
- Conduct awareness programs and workshop on the harmful impact of single use plastic
- Encourage student to the spread the importance of banning plastic in the community that they live.
- Mandate faculty on teaching staff and students to avoid the use of plastic bags and other plastic items and to increase the use of alternate solutions like paper folders, cloth bags and jute files, etc. Instead of plastic made items.

As part of its initiatives for environmental sustainability the following instructions and guidelines are implemented by the college:

- Spread the importance of energy conservation.
- Reduce the use of disposable items in all functions and meetings.
- Promote the use of e-copies and e-documents print on both sides of paper.
- Plant trees on important days of celebrations

Tree Plantation Activity

Continuing with its tradition of preserving the environment and having eco-friendly activities, the "Tree Plantation Event" was conducted in the Adsul's Technical Campus on world nature conservation day, 28th July 2021. Understand the importance of nature for our existence and conserve the nature in all manner, is our moral responsibility. It's not too hard to believe that without trees we, humans would not exist on this beautiful planet. Also, we have felt the change of purity in nature and reduction in pollution effect during this pandemic situation. While the latest technology has provided us with many comforts, the consequent urbanization and industrialization also have some undesirable side effects; Global Warming is one of those. This event is a positive step towards achieving a healthy environment and to reconnect humans to nature and foster environmental stewardship.

Dr. Kamble V. V. shared an outlook towards nature that must be changed from Utility to Divinity, he added, "We should not only save the trees but should put our equal efforts in planting as well nurturing the trees till its growth." Students and staff have planted more than 50 saplings in the campus. At the plantation of saplings, all have recited a shloka to maintain the divinity between the human and nature.

Clean Campus Activity

Clean Campus promotes Hygiene; it improves hygiene level in campus and also helps to reduce the spread of sickness, maintaining a clean campus environment sets a good example to students. Cleanliness encourages learners to take pride in their college, which makes them less likely to drop litter and as such they will potentially make a bigger effort to maintain their environment. Cleanliness gives rise to a good character by keeping body, mind, and soul clean and peaceful. Maintaining cleanliness is the essential part of healthy living because it is the cleanliness only which helps to improve our personality by keeping clean externally and internally. Adsul's Technical Campus had organized a Clean Campus campaign on world nature conservation day, 28th July 2021 to educate and to promote civic sense among students community. Students gathered to clean the campus; enthusiastically they collected plastic wastes, tea cups, weeds, and dry leaves spread in the campus. The volunteers collected all the waste and trash bags and handed over to Raj Hans Agency which provides cleaning services. The whole cleaning drive was quite inspiring and motivating for the students and staff of Adsul's Technical Campus.

Subject: - **About Permission of "Tree plantation".**

Respected Sir,

We have the honor to state that we are very interested to organize a tree plantation on the occasion of 'ENVIRONMENT DAY' that is 5th of June 2019 in our college campus. We all know that tree plantation today has turned into a revolution. People all over the country have taken the program very enthusiastically. Moreover, the government agencies and the private sectors have come forward to make the program a complete success. Being a part and parcel of the society, we cannot remain idle. Rather, we should work shoulder to shoulder for tree plantation with the mass people of the country.

Under the above circumstances, we pray and hope that your honor would be kind enough to permit us to organize tree plantation to save our environment in the campus so that we can create awareness about tree plantation as well as importance of environment in our life among the students of the college.

I am very pleased to tell you.

Thanking you.

Yours sincerely,

Principal

Report on Tree Plantation

The Tree Plantation was organized by Adsul Technical Campus College of Engineering, Chas, Dist. Ahmednagar in academic session 2018-19. It was held in the college campus. All the preparations such as arrangement of tree and water etc. were made. The Program was inaugurated by Principal of institute. The honorable principal of our institute give speech on the growing need of Plant in the state and commended the young to do such social activity. Globally, forest cover is one-third less than what it once was and global deforestation continues at 18 million hectares per year. This indiscriminate felling of trees, needs to be undertaken on a large scale to reverse the ill effects of deforestation and restore the ecological balance. The enthusiastic helping came forward to tree plantation during the program which included teaching & non-teaching staff, students. This social activity was successfully accomplished with everyone's support. It is a proud feeling after completing this Tree Plantation program. As our college is in rural area & grooming day by day, we are planning more eagerly for such kinds of events.

Tree Plantation Program Details:

Date: 1 st July, 2018		Time: 08:00am to 01:00pm
